Sakai Faculty User Manual:

PRESENTATION TOOL

For Sakai 2.5

Lenoir-Rhyne University

	The Presentation Tool allows you to present a set of slides to many viewers. You can control the viewing and pacing of the slide show for everyone or allow them to individually control it. ***This is not a PowerPoint presentation, but a slide show that shows fully prepared slides. Captions will need to be embedded on the slide.***	
Presentation Tool RESOURCES "Add" CREATE FOLDERS	The setup of this tool is a bit different from the others. You are going to begin using the RESOURCES tool. ■ Choose RESOURCES from the list of tools on the left hand side of your screen. ■ Click the dropdown arrow next to "Add" and select CREATE FOLDERS. ■ Name the folder "Presentations" (case specific). Click **Create Folders Now**. ■ Click "Add" next to the "Presentations" folder and select CREATE FOLDERS again. ■ Name the folder with the title of your presentation or something that will differentiate it from other folders. Click **Create Folders Now**. ■ Finally click "Add" next to the folder you named in the last step. Upload your images to this folder. It will accept any web-displayable image file including .gif, .png, and .jpg.	If you want to add a PowerPoint presentation, upload it with the RESOURCES tool. Don't place it in the "Presentations" folder.
PRESENTATION VIEW SHOW	■ Choose PRESENTATION from the list of tools on the left hand side of your screen. ■ You should see the name of the folder you named earlier. You have the option to VIEW or SHOW the presentation. See the 2 notes below.	If you don't see the folder, click REFRESH.
	VIEW / SHOW -these are the faculty choices. VIEW mode allows viewers to move through your presentation independently. SHOW allows you to change the slide the student is seeing.	
JOIN	VIEW /**JOIN**-these are the student choices. The student can user the **JOIN** mode to follow along as you move through your presentation.
